

# Integrating your CommCare app with Simprints

**i** This feature requires a CommCare Advanced Software Plan

For more details, see the [CommCare Software Plan page](#).

Additionally, please request [sales@dimagi.com](mailto:sales@dimagi.com) to enable this integration for your CommCare project space.

## Overview

Simprint's hardware + software biometric solution is designed for projects at the frontlines of global health, international development, and humanitarian relief. Simprints plugs into your existing CommCare apps, allowing you to enroll and identify beneficiaries with the touch of a finger. Once Simprint's solution is integrated with your CommCare app, your workflow for enrolling and identifying beneficiaries will be as shown below.

### Enrolling a beneficiary

**Step 1 - CommCare**

*Add fingerprints form*

**Step 2 - Simprints**

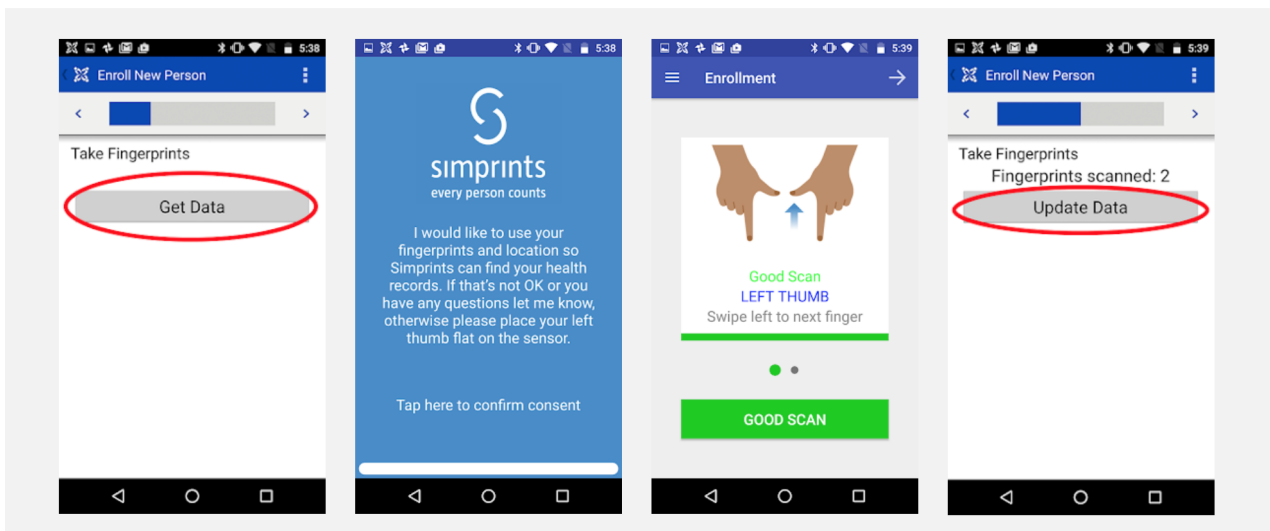

*Get beneficiary consent*

**Step 3 - Simprints**

*Enroll fingerprints*

**Step 4 - CommCare**

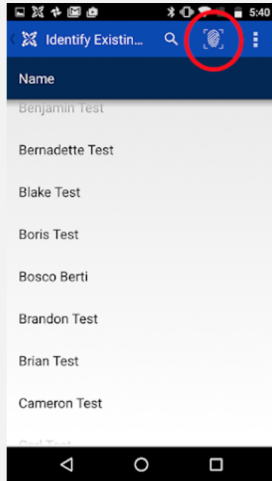

*Proceed with workflow*

# Identifying a beneficiary

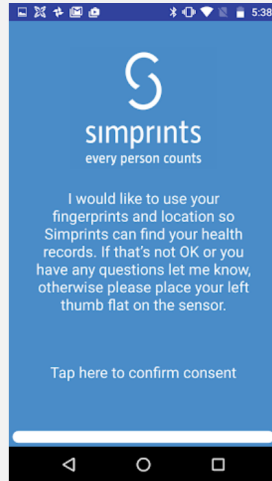

## Step 1 - CommCare

Search a case list

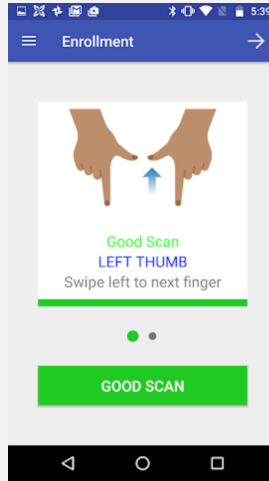

## Step 2 - Simprints

Get beneficiary consent

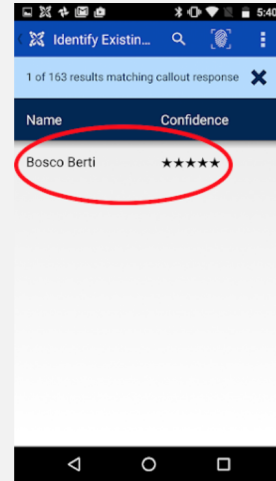

## Step 3 - Simprints

Capture fingerprints

## Step 4 - CommCare

Return correct beneficiary

## Integration Steps

### Prerequisites:

- [Simprints ID](#) Android app needs to be installed on your mobile device that has your CommCare app
- You would need a Project ID from [Simprints](#)
- You would also need the following credentials from Simprints to login to the Simprints ID app:
  - Project ID (same as above) or QR Code

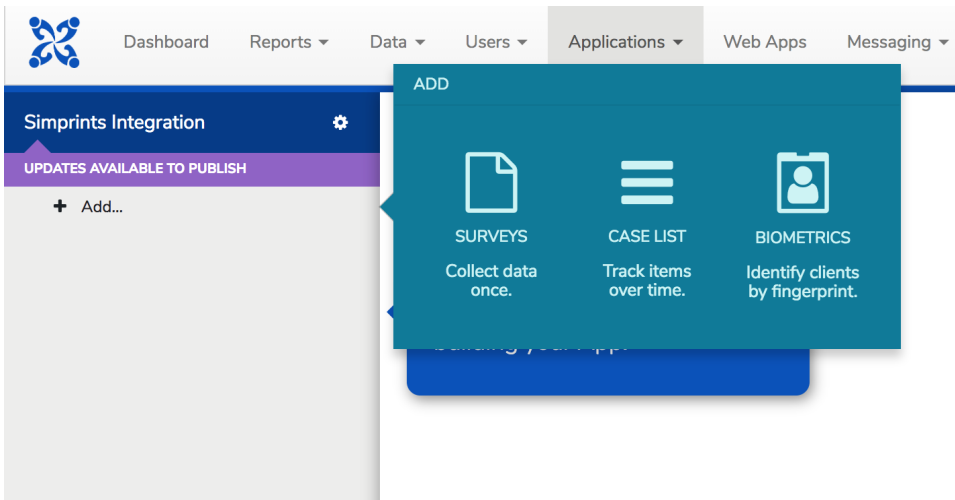

### Steps:

1. From CommCare HQ, go to your Project Space's Project Settings page, and click Biometrics Integration on the left-hand navigation.

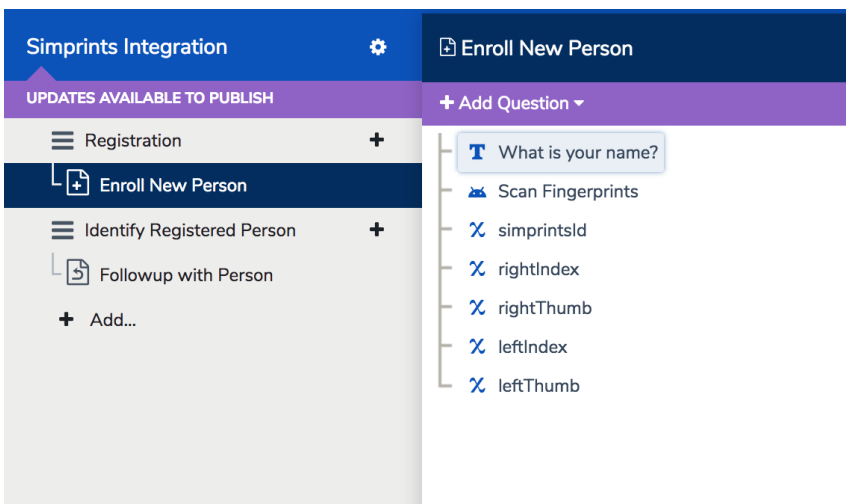

Simprints Integration

Simprints Integration	<input checked="" type="checkbox"/> Enable Simprints Integration
Project ID	<input type="text" value="0YCA2hrHQkweiEp8ZnMB"/>
User ID	<input type="text" value="global_user"/>
Module ID	<input type="text" value="global_module"/>

2. Check the 'Enable Simprints Integration' check box, and enter the Project ID you received from Simprints.
  - a. Do not change the User ID and Module ID
3. Go to your app, and add a new Biometrics module.

4. Adding the Biometrics module, will create the following two Case Lists. One for Registration/Enrollment and the other for Followup/Identification.

5. That's it! Deploy the app on your mobile device and check out the workflow. Please note that the first time you do this, you will be asked to login to the Simprints ID app using Project ID + Key, or a QR Code, all provided by Simprints.

## Suggested Hardware

The following are the recommended specifications for an Android device for those seeking to use Simprints. More details can be found on their website [here](#).

Specs	Minimum (as of July 2019)	Recommended (as of July 2019)
Android Version	5.0 (Lollipop)	Latest - 9.0 (Pie)
Android API Level	21	Latest - 29
CPU	1.4 GHz Quad Core	2.1 GHz Quad Core or better
RAM	1GB	2GB or more
Internal Available Memory	300MB *depends on # of beneficiaries and fingers	1GB or more
Bluetooth	2.0	4.0
