

Form Data

Purpose: get all of the data associated with a form submission, including all form property values. The form data may be presented to an end user as detailed data associated with a particular case. For example, by clicking on a prenatal visit hyperlink in a case summary screen, the end user may be presented with clinical data associated with a specific prenatal visit.

Single Form URL: [https://www.commcarehq.org/a/\[domain\]/api/\[version\]/form/\[form_id\]/](https://www.commcarehq.org/a/[domain]/api/[version]/form/[form_id]/)

Sample URL:

```
https://www.commcarehq.org/a/corpora/api/v0.5/form/66d7a362-18a2-4f45-bd84-06f19b408d64/
```

Sample output:

```
